

Our Goal:

To provide superior guidance and support for all of your airflow measurement and control needs.

Our Approach:

Each and every project is a unique experience and opportunity to provide airflow measurement and control solutions. We feel that a particular “solution” should be driven by the customer’s wants and needs.

It is our responsibility to teach the customer how this can be done, so that they can make a decision to best fit their individual needs. By sharing our expertise, we empower the customer.

Our Qualifications:

Weber Sales has been selling air flow measurement & control products for over 15 years.

Our new Operations Manager comes directly from the Tek-Air Systems headquarters in Danbury, CT. His 13 years experience with them covered all aspects of their business, including building product, customer support, managing the Service Department (nationally), and value engineering of new projects.

Weber Sales/ Services Division is
Indiana’s only factory certified
Tek-Air Systems Integrator

*Success can only be measured by
Customer Satisfaction!*

MJ Weber Sales is proud to announce our new Services Division. With this addition to our Product offerings, we can now provide complete air flow measurement and control solutions and services, allowing us to provide the customer a turn-key project.

Be it a simple outdoor air measurement, or a complete Laboratory suite controls project, Weber Sales/ Services Division has the ability to provide all of your field service needs.

WEBER SALES/ SERVICES DIVISION IS PLEASED TO PROVIDE THE FOLLOWING SERVICES FOR ANY SIZE PROJECT

- **Project Engineering**
- **Programming**
- **Project Management**
- **Equipment Installation**
- **Field Calibration**
- **Project Start-up & Commissioning**
- **Customer Training**
- **Preventative Maintenance Programs**
- **Troubleshooting (phone support)**

All Services can be provided as negotiated work, on a T&M basis, or contact us to discuss a potential Service Contract or Maintenance Agreement.
